

VQS-200

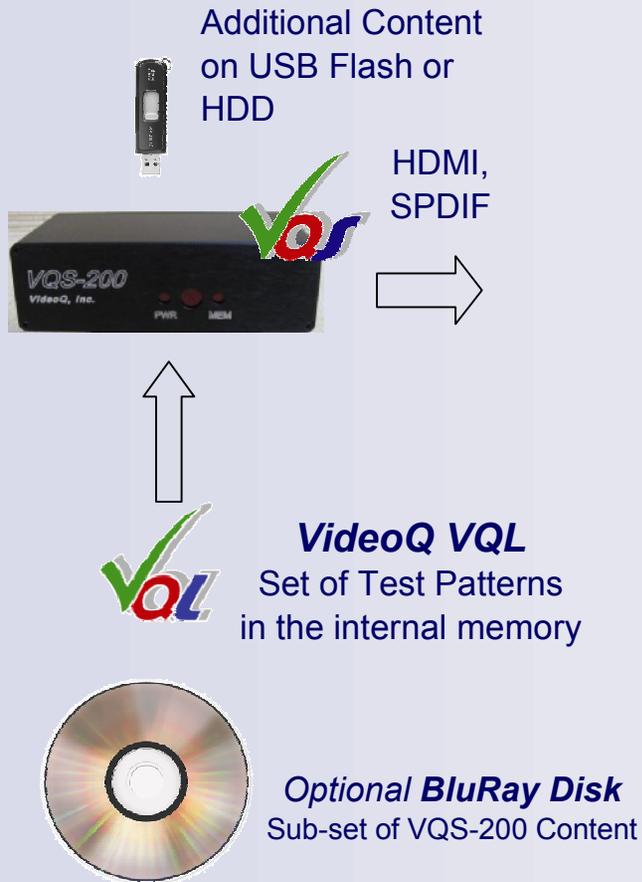

HDMI/SPDIF

Media Player & Reference Source

VideoQ, Inc
www.videoq.com

Target Applications

Compact size tool, loaded with unique sophisticated set of static and dynamic test patterns up to 1080p@60fps, ideally positioned for applications in:

- § Broadcast and Prosumer Studios
- § Home Theater Installation & Calibration
- § Engineering & Development
- § Shows & Exhibitions
- § Technical Training
- § Benchmarking
- § AV Retail
- § AV Repairs

VQS-200 Key Features

- HDMI 1.3 output:
 - 16-235 and 0-255 level schemes switchable by test file selection
- Multi-format SD and HD playback:
 - 480p@60, 576p@50, 720p@50, 720p@60
 - 1080i@50, 1080i@60, 1080p@24, 1080p50, 1080p@60
- Video Codecs & Formats:
MP2, MP4, H264/AVC, VC1; AVI, MP4, VOB, TS, M2TS
- SPDIF 5.1 and Analog Audio (L+R) out
- Audio Codecs & Formats:
WAV 5.1, AAC-ADTS, AC3, MP3
- Auxiliary CVBS output (**NTSC/PAL**)
- Flexible pixels mapping and scaling:
 - No scaling (dot-by-dot), if file resolution matches HDMI resolution
 - Up- and down- scaling to match the HDMI resolution, if AutoScaling=On
- Easy Navigation thru straight forward folders and files with Remote Control
- Slide-show with adjustable speed:
 - **BMP images, including Static Test Patterns**
- Easy expansion with any external USB storage device: live clips, user content, etc.

**USB, HDMI, SPDIF,
CVBS. Analog Audio**

**Folders & File Names
for easy navigation**

On-screen Menu

VQL Test Patterns Families

1. **Live Clips**
Critical materials in a variety of resolutions and frame rates
2. **Static Basic Tests**
Aimed at testing YUV/RGB levels and YUV/RGB frequency response
3. **Static Advanced Tests**
Aimed at checking display gamma, color space conversion (matrixing) and gradations linearity
4. **ScalTracker (Visual) Test:**
Dynamic test aimed at testing cascaded scalers, aspect ratio convertors and frame rate convertors
5. **ZonTracker Test**
Multi-purpose universal dynamic test to check overall video performance thru scalers, codecs, etc
6. **Color Space Explorer**
Visualize color space transformations, smoothly going thru all 16 millions colors in 8 bit YUV space
7. **Dynamic Contrast Tests:**
Allows at glance assessment of luminance gradations rendition - static and dynamic, global and local
8. **Audio Tests**

Static Test Patterns are in uncompressed BMP 24 bit format; 0-255 and 16-235 level schemes

Dynamic Test Patterns are typically in high bitrate AVC-TS or AVC-M2TS formats

Audio Tests are in WAV 5.1, AAC-ADTS, AC3 and MP3 formats

Semi-custom and full custom SD and/or HD versions of VQL test patterns are available on request, as well as custom patterns, patterns with user's logo, etc.
